

Proven analytical brands Support that runs deep

xylem
Let's Solve Water

Wastewater

While serving a wide range of industries including agriculture, energy, source water, wastewater, drinking water, groundwater, R&D, ocean monitoring, food & beverage, life sciences and more, we have an extended depth of product offerings and applications expertise in four key industries:

- Wastewater
- Surface Water
- Ocean/Coastal
- Food & Beverage

We provide sensors, platforms and systems which are modular, to enable ultimate flexibility for deployment. Our range of premium products is always expanding, as we strive to design new products to reduce rising energy costs, enhance process efficiency and meet tighter regulations. Our strong applications knowledge gives our customers the confidence that we can be a true partner in developing the solutions they require.

Laboratory

We are the industry leader in monitoring water quality, flow and level. To help our customers meet the multiple challenges of water scarcity and diminished quality, flooding, and human health impacts, Xylem offers an ever-expanding offering of products, services and bundled data management and service packages.

Please visit www.xylemanalytics.com to find out more about how we can help to solve your toughest challenges.

Surface water

Sustainability. The time has come.

At Xylem, we believe in the ripple effect. Whether it's a person or a large company, we can all have an impact.

Our decisions and actions are like stones dropped in a pond creating ripples that travel outward and impacting others. What we do at Xylem can change the world for the better.

Our company is focused on sustainability. For more information, please visit www.xylem.com/en-us/sustainability/Pages/default.aspx
